

Powerproject Training

Introduction to Powerproject BIM

Who should attend?

This is a one-day training course for professionals who need an introduction to the 4D planning capability provided by Powerproject BIM. It is recommended that delegates should have attended both parts of the Introduction to Powerproject course.

Course objectives

At the end of the course, delegates will be able to import and link a model to a project. They will also be shown how to run 4D simulations with comparisons to baselines.

Duration

One day.

Topics include:

- ◆ Open and navigate IFC models
- ◆ Create IFC product selections and searches
- ◆ Create a bar chart from IFC Product sets
- ◆ Simulate the model
- ◆ Planned/actual views
- ◆ Model outputs

“ Very well organised course within an engaging environment that developed my understanding of the practical implementations of Powerproject BIM. ”

*Aldwyn Payne,
Project Planner, Brookfield Multiplex*
