

Powerproject Training

Managing Costs and Resources with Powerproject

Who should attend?

This is a one-day training course designed for individuals who have some experience of Powerproject and who need to manage project costs and/or resources within Powerproject. It is particularly suitable for those who have attended the Introduction to Powerproject course.

Course objectives

At the end of the course, delegates will be able to allocate costs and resources to tasks and report on these allocations using the spreadsheet and histograms. They will also be shown how to compare and report against planned versus actual data using baselines.

Duration

One day.

Topics include:

- ◆ Setting up cost and resource libraries
- ◆ Allocating resources and costs to project activities
- ◆ Displaying cost and resource information in the spreadsheet
- ◆ Displaying and customising cost and resource histograms
- ◆ Identifying over-allocation
- ◆ Tracking planned versus actual costs

Progression

Progress Analysis and S-Curve Reporting with Powerproject.

“ Trainer was very helpful, covered a lot of material and got his point across clearly. ”

*Jamie McCracken,
H & J Martin*

“ The course was well received by all who attended and covered exactly the information that was required. ”

*David Johnson,
Planning Manager, Kier Marriott*

6 hours CPD
