

Powerproject Training

Powerproject for House Builders

Who should attend?

This one-day training course is designed for those who are new to Powerproject as well as existing users who need a practical course focused on project management in house building. The course is for house builders who want to use Powerproject to help them meet their completion targets on time. It includes styles of planning relevant to the house building industry.

Course objectives

At the end of the course, delegates will be able to gain practical experience of how to use Powerproject to manage house building projects. At the end of the course, delegates will be able to:

- ◆ Create a plan showing the build stages for different house types
- ◆ Pull out reports showing the jobs for each sub-contractor from the main project plan
- ◆ Include pre-construction activities, like the land programme in your overall plan
- ◆ Update progress on the project
- ◆ Produce high quality printed or electronic output, including borders and annotations

Duration

One day.

Topics include:

- ◆ Calendars
- ◆ Creating a linked bar chart
- ◆ Creating build programmes
- ◆ Monitoring completion dates
- ◆ Managing sub-contractors
- ◆ Creating templates to speed up planning
- ◆ Capturing progress from site
- ◆ Outputting presentation quality plans

“ The excellent standard of on site training they provide continues to allow our users to utilise the full potential of this extremely powerful and effective management tool. ”

*Mick Moorhouse,
Director, Hargreaves Contracting*

6 hours CPD
