

Staircon

Software for design and manufacture of stairs

Staircon gives you the power and flexibility to get the job done right

Staircon is designed to provide the best possible support for a simplified and cost effective production of stairs – from sales to production. The powerful and user-friendly software enables fast design of standard stair shapes as well as flexible design capabilities for advanced shapes.

The modular architecture of Staircon enables you to add functionality to the software as your business grows or needs change; as the business grows more functionality can be added. Staircon is offered in different licence levels with feature-sets ranging from web-based presentation to advance CAM-production.

Staircon is continuously improved by our development team. We believe that stair designs will continue to evolve and that new production methods and modern technology continues to advance innovation.

UK based support team

Technical support is part of the success of any CAD/CAM software. Staircon offers strong UK based support to its customers.

Easy-to-use

Staircon is developed for Microsoft Windows, an environment familiar to most users. The intuitive graphic user interface is well laid out, easy to learn and easy-to-use.

Development

The first version of Staircon was released in 1999. Since then it has been our aim to keep Staircon as the leading software on the market for stair production. Staircon is continuously developed because we believe that stair design will continue to evolve and new production methods and modern technology will continue to advance innovation.

We offer the following options:

Desktop applications

"Staircon has undoubtedly helped us to build our business. We couldn't process this volume of work without it... Using Staircon to produce the drawing, the coding and the production data makes everything move through so much quicker, to get the job done. It helps us maintain ultra-high quality."

Paul Elkin, Manager, Excel Stairs
